PH 3½-3 Pendant Light by Louis Poulsen

The PH 3½-3 pendant is based on Poul Henningsen's original drawings from the late 1920s and early 1930s, featuring his renowned three-shade system. The principle behind the 3 shade system, is to provide glare-free, diffused lighting that is effective in the room. The shade system has now been used for countless of light fixtures, released by Louis Poulsen for many decades, using various materials and installations.

The PH 3½-3 pendant light has a metal lampshade, available in green, yellow, red or white, with white rolled edges which creates a warming glow. The pendant can be used in many settings, as it provides a general illumination and a downward directed light that is perfect for hanging over tables and surfaces. Use in dining areas, lounges, bedrooms and more, whether used alone or in clusters/rows. Mix and match different colours, for a truly vibrant look!

Designer: Poul Henningsen
