Fairy Ceiling Light by Axolight

Fairy lights are guaranteed to create a sparkly, almost fairytale atmosphere into any interior space. The collection was designed by Manuel Vivian for Italian company, Axolight. Fairy ceiling light has a transparent glass diffuser - available in amber, grey or crystal - with a multifaceted surface; it is this briole cut effect that creates a playful game of light, even when it's switched off. Fairy ceiling light can be installed in hallways, above a kitchen counter, a reception area, a sitting area and are ideal for use in hospitality, in both commercial and residential projects. A Fairy light has a strong personality and will match with both modern and traditional decors. The light also benefits from an integrated LED source, making the light energy efficient. While the glass diffuser is available in different colour options, the frame and ceiling canopy have a chrome finish, adding to the reflective properties of the light.

The [Fairy Collection](#) also includes a recessed light, wall light and a linear suspension. The family is also comprised by numerous suspended lights, with a single or multiple lights and linear or circular ceiling canopies. Please [contact us](#), for more information and pricing.

Note: Driver included.

Designer: Manuel Vivian
