Vibia Wireflow Suspension

The Vibia Wireflow LED Suspensions are a unique concept, priding themselves on their adaptability. Designed by Arik Levy, the Wireflow suspension lights can accommodate a range of spaces, styles and compositional requirements. Wireflow consists of black electrical cables that are interwoven to create bold geometric shapes that still offer a hint of minimalism. Available in a vast array of shapes and sizes, each Wireflow light can be displayed individually or grouped in larger spaces. Each variation offers a different number of LED light sources, but all provide a functional downlight, it is a guaranteed eye-catcher and naturally draws people's attention to itself.

Depending on the density of composition and width of each layer, Vibia Wireflow can be shaped into a glittering canopy of terminals or a cascading pyramid, spanning multiple stories and unifying the space with its slender profile. Each chandelier is a beautiful addition to stairwells, entryways, large dining or living areas and even dining spaces. Wireflow is the definition of contemporary minimalism.
