PRODUCT DESCRIPTION

Designer: Arik Levy

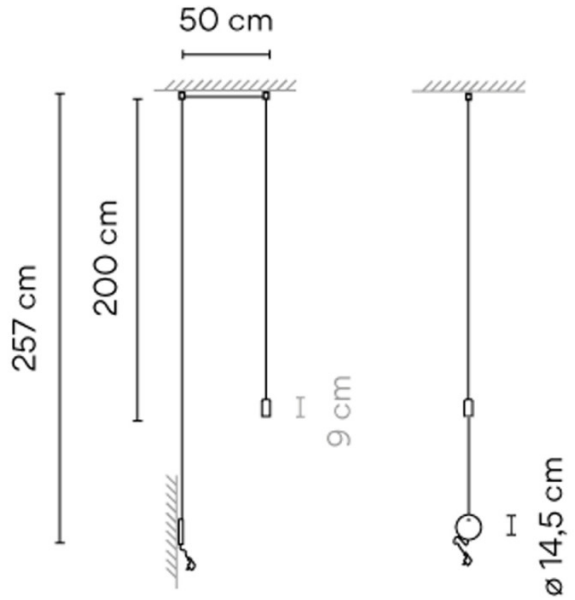

Vibia Wireflow 0347 Lighting System

The Vibia Wireflow 0347 LED Lighting System is a unique design by Arik Levy, working as both a wall light and ceiling light. The cables can be easily directed by yourself to create unique configurations and the LED light source is held within a pressed glass diffuser to create a soft output and prevent glare. The Wireflow 0347 system utilises the collection's iconic black electrical cables and clips, allowing you to play with space and depth - this lighting solution not only provides functional lighting but is also presented as a sculptural piece of art.

The Vibia Wireflow 3047 is a perfect example of contemporary minimalism, adapting to almost any interior and providing your space with decorative statement lighting. It is a beautiful addition to living rooms. kitchens, dining rooms and offices.
