PRODUCT DESCRIPTION

Designer: Ernesto Gismondi

Artemide Architectural Tetragono LED Outdoor Floor Lamp

The Artemide Architectural Tetragono LED Outdoor Floor Lamp is a compact bollard system designed for pathways, driveways and external circulation routes. Each luminaire is built around a square aluminium profile in grey anthracite, with a sealed polycarbonate head and metalised reflector that delivers a controlled radial light distribution. At 3000K with CRI 90, the 15W integrated LED light source provides comfortable, functional illumination while maintaining a low profile within the landscape.

Available in two heights, 45cm and 90cm, Tetragono can be scaled to suit both residential and commercial settings. The lower version is well suited to intimate garden paths and terraces, while the taller 90cm model works effectively in car parks, larger routes or mixed use schemes where greater visibility is required. IP65 protection, IK10 impact resistance and a multi stage outdoor coating system support long term durability in exposed environments.

Each bollard is supplied with a painted steel base flange and pre wired IP67 connector for straightforward installation to prepared foundations. The minimal geometry and neutral finish allow Tetragono to sit comfortably alongside a wide range of materials and architectural styles, making it a practical choice where a simple, repeatable bollard typology is required.

As the official UK distributor, we can support you with the Artemide configurator and specification. Contact us at artemide@davidvillagelighting.co.uk.

PRODUCT SPECIFICATION

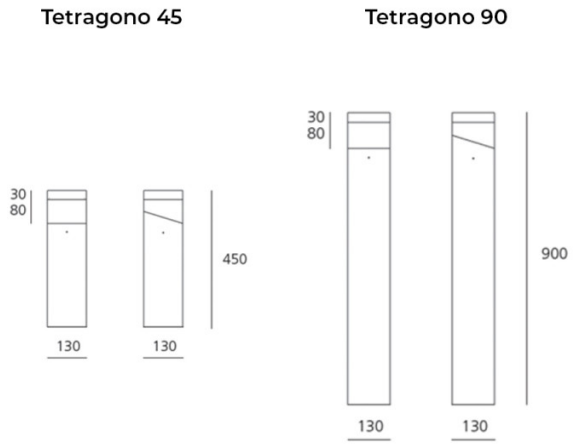

Light Source: **Tetragono 45:** 15W, 3000K, 481 lumens
Tetragono 90: 15W, 3000K, 481 lumens

IP Code: 65

Dimming: Non-dimmable.

Dimensions: **Tetragono 45:**
Height: 45cm
Base: 13cm²

Tetragono 90
Height: 90cm
Base: 13cm²
