PRODUCT DESCRIPTION

Designer: Ernesto Gismondi

Artemide Architectural Tetragono LED Outdoor Wall Light

The Artemide Architectural Tetragono LED Outdoor Wall Light translates the clean geometry of the Tetragono bollard into a compact facade mounted luminaire. The square aluminium body in grey anthracite houses a 15W integrated LED light source and metalised polycarbonate reflector, enclosed by a UV resistant, impact resistant polycarbonate diffuser. The result is a controlled radial emission that provides comfortable accent and orientation lighting around doors, stair cores and external circulation routes.

With IP65 protection and IK10 impact resistance, Tetragono Wall is designed for exposed exterior environments, from residential entrances to hospitality terraces and access routes. The 3000K, CRI 90 light source delivers a warm but precise output that sits comfortably alongside other architectural lighting elements. The simple square form allows the fitting to align visually with the Tetragono bollards, supporting coherent schemes where floor and wall mounted elements are required.

The luminaire is supplied with integrated electronic control gear for 220–240 V operation and a pre wired IP67 connector to support straightforward installation. Its compact proportions and neutral finish make it easy to repeat along a facade without dominating the architecture.

As the official UK distributor, we can support you with the Artemide configurator and specification. Contact us at artemide@davidvillagelighting.co.uk.

PRODUCT SPECIFICATION

Light Source: 15W, 3000K, 481 Lumens

IP Code: 65

Dimming: Non-dimmable.

Dimensions: Depth: 16.5cm
Base: 13cm²
