PRODUCT DESCRIPTION

Designer: Joan Gaspar

Marset Polo Table Lamp

Designed by Joan Gaspar, the Polo table lamp is renowned for its fluidity of movement. With an effortless touch, the ball joint system within the mechanisms of the lamp allows the arms to move and adjust with great precision. This makes the LED Polo a successful task light and reading light as it can aim the beam of light with pinpoint accuracy. This hardy and solid design pay homage to the retro history of the classic table lamps. With adjustable arms and warming light, this LED Table lamp embodies the soul purpose and minimalism of a classic task light. The integrated wheel switch located on the diffuser of the lamp is also another reference to the retro past that has inspired the lights of today.

This hardy and solid design has also been made into a [floor lamp](#).
