FOSCARINI

Foscarini Rituals Wall Light

A new family of wall lights all concentrated on the diffuser and defined by the volume and material nature of glass. A collection of two diffuser shapes in hand-blown glass made using a glass-blowing procedure without turning the glass in the mould (referred to as "stationary"); the striped effect is achieved using a mould with negative decorations which are repeated across the surface of the glass, which is subsequently ground manually "by belt" and which then undergoes immersion in acid in order to emphasise the plaster-like effect.

The flexible Rituals Wall Light can be turned upside down for variety, and comes with an external dimmer. The Light's flexibility allied to the soft light and striking form make this wall sconce perfect for use in any home or business setting.

The Foscarini [Rituals Collection](#) also includes ceiling lights, pendant lights, table lamps and XL versions.

Lamp excluded.
