FLOS

Ipnos Exterior LED Floor Lamp by Flos

Anodised in three finishes, black, bronze or aluminium, the Ipnos outdoor floor lamp features a unique lighting structure of LED lights on its extruded aluminium frame. The structure also features transparent polycarbonate diffusers that protect the source of light and provide a diffused and soft light. The Ipnos exterior floor light is ideal for illuminating a terrace, balcony or garden, adding a touch of style and practicality to your outdoor space

Designed by Nicoletta Rossi and Guido Bianchi for Flos, the Ipnos floor lamp is a simplistic and beautifully refined piece of modern art consisting of a geometric composition with sleek edges and a minimal box frame design – a contemporary style lantern.

With the added benefit of the addition of a transparent top plate, the Ipnos LED floor lamp can be transformed into a table which can withstand up to 5kg of weight. The Ipnos exterior floor lamp is also available as an [indoor version](#).

Designer: Nicoletta Rossi & Guido Bianchi

IP Code: 65

Dimming: In line on/off switch included on cable

Dimensions:

35cm width

70cm height
