PRODUCT DESCRIPTION

Designer: Joan Gaspar

Marset Ginger XL 42 LED Floor Lamp

Marset Ginger XL 42 LED Floor Lamp is an adjustable floor lamp by Joan Gaspar, built around the thin circular shade used across the Ginger collection. The pressed wood diffuser is made from sheets of wood, paper, and resin compacted under high pressure, creating a slim shade that keeps the warmth of natural oak or wenge. The light source is hidden beneath the shade, giving the lamp reflected light rather than a direct exposed LED.

The XL 42 floor lamp uses a suspended shade and adjustable structure, allowing it to work like a pendant in areas where a ceiling light is not practical or wanted. The stem and suspension system allow the shade to move forward and back, as well as side to side, while the carbon fibre arm can be tilted depending on the position of the pivot joint. Its smaller scale makes it easier to place than the XXL 60, while still giving the lamp enough reach for seating areas, reading corners, and tables.

Ginger XL 42 is available in Oak and Wenge finishes, both with a lacquered matt black structure and black electrical cord. The integrated LED gives warm 2700K light, and the foot-operated progressive in-line dimmer allows the output to be adjusted from a brighter task light to a lower evening level. Most suited to living rooms, reading areas, dining spaces, lounges, bedrooms, hotels, restaurants, and interiors where an adjustable floor lamp can provide warm reflected light without needing a ceiling suspension.

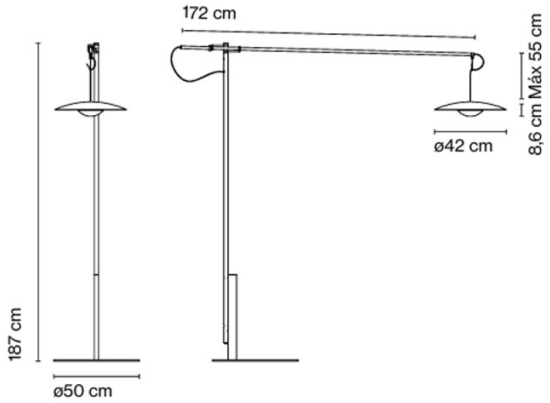

PRODUCT SPECIFICATION

Light Source: 17W, 2700K, 698 Lumens

IP Code: 20

Dimming: In-line dimmer included on cable.

Dimensions: Shade: Ø42cm
Shade Height: 8.6cm
Base: Ø50cm
Height: 187cm
Cable Length: 250cm
