PRODUCT DESCRIPTION

Designer: Joan Gaspar

Marset Plaff-on! LED Ceiling Light

Marset Plaff-on! LED Ceiling / Wall Light is a simple ceiling and wall light by Joan Gaspar, built around an opal blown glass shade held within a lacquered aluminium ring. The glass diffuser appears slightly detached from the surrounding structure, so the light filters down through the shade while also creating a softer halo around the fitting. It is a quiet design, but the floating glass detail gives it more character than a standard surface light.

The collection is available in three sizes, with the smaller 16cm version suited to tighter spaces and the larger 33cm and 50cm versions giving more presence on ceilings or larger walls. Black and Rust Brown are available across the three sizes, while White is only available in the 16cm version. Plaff-on! can be used as a single light in smaller areas or repeated across a ceiling or wall where a more even spread of light is needed.

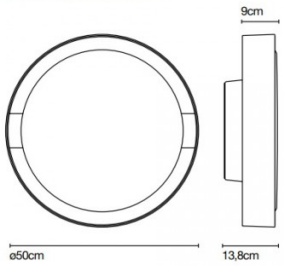

The Plaff-on! 16 has an IP65 rating, while the Plaff-on! 33 and 50 have an IP54 rating, making the range suitable for bathrooms and covered outdoor areas, provided the correct version is chosen for the space. The LED versions are dimmable using Triac dimming, with warm 2700K light. Most suited to bathrooms, hallways, utility areas, entrances, covered outdoor ceilings, patios, restaurants, hotels, and spaces where a simple glass ceiling or wall light is needed.

Please Note: The Marset Plaff-on! 33 and Plaff-on! 50 LED Ceiling / Wall Lights can also be supplied with DALI dimming and 3CCT options. Please contact us for more information and pricing.
