PRODUCT DESCRIPTION

Designer: Box Arkitekter

Orsjo Belysning PJ72 Wall Lamp.

The PJ72 Wall Lamp is a functional and adjustable wall light, used for both private and public spaces. It consists of one arm and is the smaller version of the PJ70 wall light - but still guarantees extensive movement, making it a perfect task light. Ann Morsing and Beban Nord at Box Arkitekter were inspired by the work of PeFeGe Eriksson when developing the PJ collection, they have updated the classic 1940's industrial lamp to meet modern day needs. The PJ72 is still as practical and elegant as the original work lamps were over 60 years ago, but now with the enhancements of modern day technology.

The flexible arm moves effortlessly, making it easy to angle the shade and brighten a particular area, this grants you the ability to create a direct light source and makes it a perfect task light. Due to its mounting option, the PJ72 also has the benefit of saving space, making it perfect for those smaller workspaces or home offices where you lack desk space.

The PJ72 is available with a 250cm black cord, plug and wall attachment, or is suitable to be hard wired.

The purpose of these task lights is to create a comforting direct light that is perfect for workspaces without being too clinical or harsh. And this is why the PJ collection soon became on office classic. **Explore the PJ collection today.**

PRODUCT SPECIFICATION

Light Source:	1 x Max 11W LED E27 (excluded)
IP Code:	20
Dimming:	Integrated on/off switch on the product.
Dimensions:	Shade: Ø16cm Long Arm: 35cm Short Arm: 11.5cm Wall Base Height: 13cm Shade Height: 27cm Cable Length: 250cm
