Zero Fog LED Pendant

A glowing orb of light, the Zero Fog LED Pendant by Front Design offers a mesmerising blend of subtlety and statement. Its glass globe, sandblasted at the base and clear at the top, creates the illusion that the light emerges from within, with no visible source. This mysterious glow recalls the image of a celestial body shrouded in mist, casting an ambient presence that feels both otherworldly and elegant.

Crafted from glass and painted steel, the pendant conceals its LED technology within the upper fitting, producing a soft, atmospheric glow that gently fades as it rises. Available in a range of finishes and sizes, including custom options on request, it also features a 230cm suspension cable for flexible placement. Whether illuminating a dining area or adding character to a commercial space, the Fog Pendant balances technical sophistication with sculptural charm.
