Catellani & Smith

Catellani & Smith Fil de Fer 12V Floor Light Ø30cm

Designed and created by Enzo Catellani over ten years ago, the Fil de Fer lamp is made of aluminium wire that has been expertly sculpted and intertwined and is lit up from within by micro halogen bulbs. After some technological tweaks, it is now available with next-generation LED bulbs in a variety of shapes and sizes. These include traditional round squeezed spheres (in various diameters) as well as suspended clouds (Nuvola), cascades (Cascata), plus light blocks (Teca) and rails (Corrimano).

sphere made of natural aluminium wire with nickel or anodized in gold colour with gold anodized colour base.

Lamps: 8xG4 1,5W 12V DC LED bulb / dimmer included

Also available in larger sizes and in a Gold finish. For further details, pricing and orders please [contact us](#).
Colour:Aluminium
