PRODUCT DESCRIPTION

Designer: Enzo Catellani

Catellani & Smith Stchu-Moon 08 Floor/wall Lamp

Stchu-Moon 08 Floor/Wall Lamp separates the light source from the lamp, providing a unique configuration. This light is crafted by specialist artisans and therefore, each creation is completely unique. Light refraction joins forces with intentionally textured surfaces in order to multiply the light's quantity and make the object itself luminous.

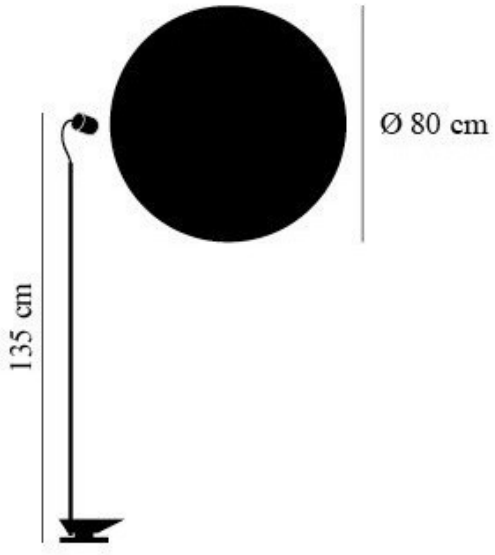

This floor/wall lamp consists of a metallic circular reflective disk, which can be mounted on your wall, and a separate floor lamp which can be manoeuvred around the room. The floor lamp structure is designed to be shone upon the reflector, in order to create an indirect illumination. This stunning structure will not only bring a unique play of light and shadow to your space but also add an artistic touch to your home while granting you full freedom of the light source. Place this in your hallway or living space to add a lasting impact in your everyday life.

Larger versions and finishes are available, for further details, pricing and orders please contact us.
