PRODUCT DESCRIPTION

Designer: Enzo Catellani

Catellani & Smith Lucenera 506 LED Floor Lamp

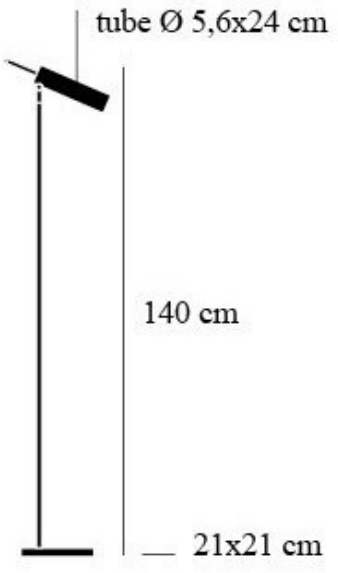

This stylish task light from Catellani & Smith features an adjustable mechanism that allows you to direct and focus the light wherever you wish. As well as being highly functional, this floor lamp is also a stunningly modern product that would suit any interior. The monochrome colour finish complements every style of home as Catellani & Smith aims to give the light center stage in this design.

A feature of the Lucenera 506 floor lamp is the rod at the back of the shade that can be pushed in and pulled outwards to increase or decrease the light intensity and beam. by pulling back on the rod you can decrease the beam and focus on an area with increased intensity. However, when pushed forward, the rod pushes the bulb to the end of the tubular shade and, in turn, increases the size of the beam for a wider area of brightness. This adjustability makes the Lucenera 506 floor lamp an ideal task light for a study or reading area.
