PRODUCT DESCRIPTION

Designer: Enzo Catellani

Catellani & Smith Light Stick 10 LED Floor Light

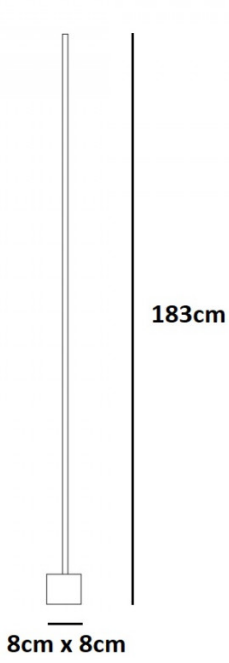

The LED Light Stick 10 floor lamp by Catellani & Smith is a sleek and slender design that uses the stunning qualities of its metallic materials to bring together both functionality and a minimalist aesthetic. With the creation of the new LED circuits, Catellani was able to move away from his more 'aggressive' designs and focus on the simple stylish nature of minimalism. This trend of incredibly simple designs creates timeless pieces that can move effortlessly through multiple interiors as it blends beautifully into a room.

This particular design was designed by Enzo Catellani with the aim of creating a lighting fixture as a discreet and almost invisible floor lamp that elegantly demonstrates the quality of LED. The Catellani & Smith Light Stick 10 is formed of a delicate 183cm high copper pipe plated in either a black, nickel, or satin gold finish. Threaded up the center of the pipe is an LED circuit with 10 LED lights evenly spaced up one side of the copper pipe. This design of having the LEDs placed only on one side of the pipe results in a floor lamp that can either be angled to face a wall for an ambient backlight or tilted round to reveal more of the bright LED light.
