PRODUCT DESCRIPTION

Designer: Enzo Catellani

Catellani & Smith Light Stick V LED Wall Light

The Light Stick V Wall Light by Catellani & Smith is a simple design featuring a long copper rod that is plated in either satin gold or nickel. The rod is embellished with a state-of-the-art LED circuit that features six LED light sources evenly spaced up the outside of the copper rod. These LED lights are fitted into the back of the structure and generate indirect illumination which is reflected back into the room and provides an ambient backlight and a glare-free effect.

This minimalist design is a timeless piece that will suit multiple interiors and styles. The sleek thin rod will blend itself beautifully into your home as it changes and shifts through the years. Place the Light Stick V wall light in your hallway or dining space to bring an effortless touch and an atmospheric ambient light.
