Catellani & Smith PostKrisi T 61 Table Lamp

The PostKrisi T 61 table lamp is an impressive feature within a home that will not only bring a unique talking point to your room but also provide beautifully diffused light for your space. The eye-catching Ø40cm shade is made from fiberglass, a versatile material that has fascinated the designer for years. Enzo Catellani, the designer and founder of Catellani & Smith, demonstrates his passion for fiberglass within the PostKrisi collection that uses hand-crafted fiberglass shades to diffuse light.

The PostKrisi table lamp features a brass rod that appears to pierce through the two hemispheres and hold them in suspension with a thin gap separating the two. This design demonstrates the beauty of fiberglass and its ability to create patterns of light wherever it is placed. With the in-line dimmer on the cable, you are able to dim the lumen output to the perfect ambiance and allow the gentle light to diffuse through the shade and highlight its unique structure. Place this lamp in a bedroom, living space or hallway for an eye-catching lighting fixture.
