PRODUCT DESCRIPTION

Designer: Bertjan Pot & Marcel Wanders

Moooi Carbon Bar Stool

The Carbon Bar Stool is the stool version of the Carbon Chair. This contemporary piece is available in two sizes: Carbon Stool High and Carbon Stool Low. The innovative seat was created by design duo Bertjan Pot and Marcel Wanders. The durable frame is created by dipping carbon fibres into epoxy resin. The material is then woven, creating a textured, net-like effect. The material smoothly transitions from the frame to the seat.

The material choice makes the Carbon Bar Stool a durable yet lightweight piece of furniture. This allows for easy movement to different locations. The availability of two seat heights (76 cm or 66 cm) provides options to fit various bars and high tables. Within the home, the Carbon Bar Stool is an ideal seating option for a breakfast bar, kitchen island, or outside bar space. In commercial spaces, the stool is well-suited to contemporary restaurants and bars, in both interior and exterior settings.

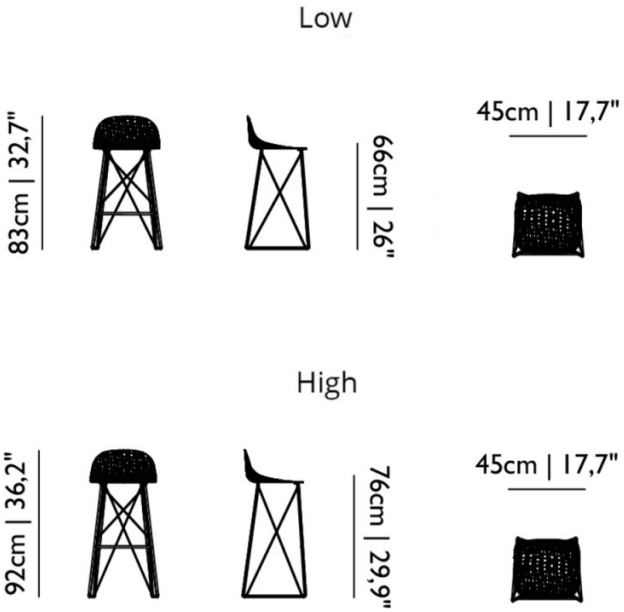

A cushion is available for an additional cost. Please **contact us** for more information.
