PRODUCT DESCRIPTION

Designer: Bertjan Pot & Marcel Wanders

Carbon Bar Stool by Moooi

The stool version of the [Carbon Chair](#), available in two sizes: Carbon Stool High and Carbon Stool Low. The innovative design and process to create the Carbon seating was designed by duo Bertjan Pot and Marcel Wanders. The durable material is created with dipping carbon fibres into epoxy resin. The material is then woven, creating a net like effect with a textured feeling. The material smoothly transitions from the seat and onto the back of the stool.

The choice of a light yet strong material makes it a durable furniture piece, as strong as steel but yet light as a feather. The choice of two different seat heights (76 cm or 66 cm) makes the Chair an obvious choice for your breakfast bar at home, or your business. The base and legs of the stool are also supported, with additional bars to strengthen the connection points. A stool that will compliment any space, that can also be used in both interior and exterior settings.

A cushion is available for an additional cost. Please [contact us](#) for more information.

PRODUCT SPECIFICATION
