Artemide Meteorite Table Lamp

Artemide Meteorite Table Lamp uses a double-layer artistic glass diffuser, handmade using the mould-blowing craft technique followed by grinding. Designed by Pio and Tito Toso, the result resembles the age-old Murano art of battuto glass, with a textured, beaten look that gives the lamp its recognisable surface.

Here, the form sits lower and closer to the surface, which gives the lamp a calmer, more grounded presence than the stem version. The blown frosted glass, steel and technopolymer base keep the overall effect soft, and across the three sizes, the same handmade construction moves from a compact table light to a fuller, more substantial object.

Artemide Meteorite Table Lamp is available in white, in Meteorite 15, Meteorite 35, and Meteorite 48 sizes. Recognised with the Red Dot Design Award in 2015, it carries the same textured glass character through each format without losing the softness of its light. Best suited for side tables, consoles, bedside settings, and other interiors where a softer diffused light is needed with a more tactile surface.
