PRODUCT DESCRIPTION

Designer: Sebastian Bergne

Luceplan Curl LED Table Lamp.

Designed by British designer Sebastian Bergne in 2012, the Luceplan Curl LED Lamp balances function with fun. The futuristic design takes up a minimal amount of space whilst still providing the same amount of light as a larger lamp. Bergne wanted to create a lamp that could easily fit in to any surroundings, he soon became well known for turning everyday objects in to works of art.

The futuristic Curl contains an LED module that produces a warm light, making it a perfect mood light for your bedside table or coffee table. The light also harnesses a dimmer on the base of the light making it easily adjustable to fit your environment. The curve of this design reflects the light to illuminate the room, it can be placed either upright or on it's side.
