PRODUCT DESCRIPTION

Designer: Michele De Lucchi & Giancarlo Fassina

Artemide Architectural Tolomeo Paralume Outdoor LED Floor Lamp

The Artemide Architectural Tolomeo Paralume Outdoor LED Floor Lamp translates the familiar Tolomeo silhouette into a robust exterior lighting tool. The aluminium and steel structure retains the recognisable articulated arm and counterweight system, while the light source is enclosed in an IP65 diffusing capsule that recalls traditional oil lamps. This ensures reliable protection for the 20W LED engine at 3000K while maintaining a clear, readable form in outdoor environments.

Designed for terraces, gardens and hospitality spaces, the Tolomeo Paralume Outdoor floor version provides adjustable, direct light that can be aimed over seating areas, tables or circulation routes. The body can be used with or without the Ø52cm shade, depending on the desired visual expression. With a shade, the lamp reads as a large outdoor lantern, while the bare capsule offers a more minimal character that emphasises the structural lines. Delivered lumen output ranges from 858 to 1673 lm depending on shade choice.

Tolomeo Paralume Outdoor Floor is supplied as a body lamp, with outdoor grade shades ordered separately in spun white, woven dove grey or black. This modular approach allows you to tailor the look to a particular project or to update finishes over time without replacing the entire luminaire.

As the official UK distributor, we can support you with the Artemide configurator and specification. Contact us at artemide@davidvillagelighting.co.uk.

PRODUCT SPECIFICATION

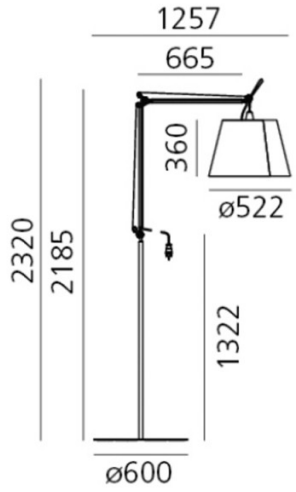

Light Source: 20W, 3000K, 858-1673 Lumens

IP Code: 44

Dimming: Non-dimmable.

Dimensions: Shade: Ø52.2cm
Height: 232cm
Shade Height: 36cmcm
Depth: 125.7cm
Base: Ø60cm

Cable Length: 180cm
