PRODUCT DESCRIPTION

Designer: Michele De Lucchi & Giancarlo Fassina

Artemide Architectural Tolomeo Paralume Outdoor LED Hook

The Artemide Architectural Tolomeo Paralume Outdoor LED Hook is the most flexible member of the Tolomeo Paralume Outdoor family, designed to hang from existing structures rather than a fixed ceiling point. The aluminium body integrates a hook above the Ø52cm shade position, allowing the luminaire to be clipped to catenary wires, beams or pergola members. As with the other versions, the 20W LED source is contained within a diffusing capsule at 3000K, delivering direct light with good visual comfort and CRI 90.

This configuration is particularly useful for temporary or adaptable exterior layouts, such as seasonal terraces, event spaces and informal garden zones. Hook luminaires can be repositioned along wires or structures to respond to changes in furniture layout or usage, while still providing the consistent Tolomeo visual language. Delivered lumen output ranges from 858 to 1673 depending on the chosen shade, making it suitable for both ambient and more focused lighting schemes.

Supplied as a body lamp, Tolomeo Paralume Outdoor Hook uses a separate outdoor diffuser shade in spun white, woven dove grey or black. The combination of movable hook body and interchangeable shades gives specifiers a practical way to fine tune atmosphere and coverage without a complex installation.

As the official UK distributor, we can support you with the Artemide configurator and specification. Contact us at artemide@davidvillagelighting.co.uk.

PRODUCT SPECIFICATION

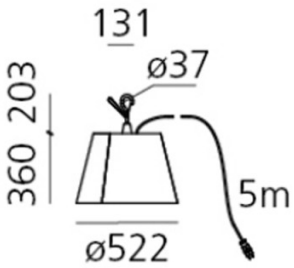

Light Source: 20W, 3000K, 858-1673 Lumens

IP Code: 44

Dimming: Non-dimmable.

Dimensions: Shade: Ø52cm
Shade Height: 36cm

Cable Length:180cm
