## PRODUCT DESCRIPTION

**Designer:** Daniel Rybakken

### Luceplan Ascent Table Light.

Simple in form, functional in use, the Ascent table light is a striking design by Daniel Rybakken. This non intrusive and intimate light **offers two table attachments: a standard base or a table bolt.**

The fundamental novelty of this light lies in the unusual gesture made to turn on the lamp, adjust its intensity or turn it off. The small shade slides along the slender stem with a fluid, continuous motion, from top to bottom and vice versa, **dimming the light output by moving the head up and down.** The higher the shade, the brighter the light source, meaning you can completely personalise your environment. This simplicity expertly conceals a complex process of design and engineering.

The Luceplan Ascent Table Light has been stripped down to create an intimate and minimalistic frame. This makes the lamp a convenient addition to your workspace as it guarantees you have as much space as possible. The Ascent would also make a perfect side table in your living room or even mood lighting for a restaurant or bar.
