PRODUCT DESCRIPTION

Designer: Inga Sempé

Luceplan Cappuccina Suspension.

Cappuccina by Inga Sempé is a fixture composed of a slender metal base and a spherical luminous body in opaline glass, containing an LED module, on which the fabric shade simply rests, without attachment: this configuration makes it possible to move the shade and orient the light to meet different needs. The concave base seems to be the imprint of the glass sphere that emits the light.

The decoration of the fabric, made with digital printing and then bonded with polycarbonate, represents a design in the design. The two patterns have been created by the designer herself: a very evocative dégradé texture. Very close in the upper part of the shade, the pattern gradually spreads downward, creating a delicate shading in tune with the light that is projected on the fabric, and granting more space to the background color, which becomes dominant. Cappuccina is ideal for the contract sector, thanks to the possibility of customizing the fabrics, and an accessory that blocks the shade.

PRODUCT SPECIFICATION

Light Source: 15W, 2700K, 692-708 lumens

Dimming: Dimmable With Wall Control

Dimensions: Shade 36 x 20 cm
Drop height 60-350 cm
Ceiling rose 19 cm
