PRODUCT DESCRIPTION

Designer: Daniel Rybakken

Luceplan Compendium Suspension Light

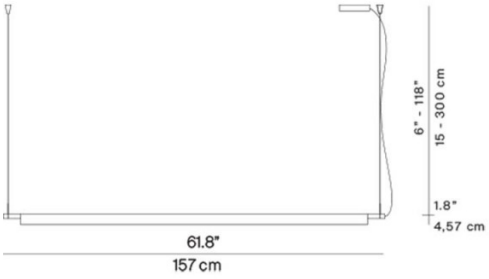

The Luceplan Compendium Suspension is essential and elegant, another minimal light from Norwegian designer Daniel Rybakken disperses an even light from within its slim form. Made of aluminium, the energy efficient LED light source is softly diffused to avoid glare, and hosts subtle wires that connect it discretely to the ceiling without affecting the modern design.

Ideally placed over tables in dining areas or hosting spaces, the Compendium Suspension Light can offer either direct downward or indirect upward lighting, depending on how you decide to display it - this can be adjusted by rotating the reflector at the time of installation. Compendium Suspension is a beautiful contemporary design. Optional Compendium Mechanical Joints, allow you to group this light together and create your own unique composition. These accessories for bodies alignment are also available.

The Luceplan Compendium Suspension can be supplied with Dali dimming if required, please contact us for more information.
