

Luceplan Fly-Too LED Wall

LA3815

SOURCE: <https://www.davidvillagelighting.co.uk/product/Luceplan-Fly-Too-LED-Wall/16576>

PRODUCT DESCRIPTION

Luceplan Fly-Too Wall. An ultraflat luminous disk, adjustable by 360° in space, to be placed in infinite positions. Fly-too is an LED wall lamp with an innovative optical system that generates perfect bi-directional floodlighting.

Light sources are positioned in the extruded anodized aluminium of the outer ring. They project their light inside a very sophisticated optical element specially developed by Luceplan. The methacrylate lens, featuring a lenticular system with recovery of marginal light flow, is organized in two joined disks. The internal face has a Fresnel lens that amplifies light intensity, while the outer surface has a microsphere texture capable of increasing the bi-directional "flooding" of the light. The joint connects the body of the lamp to the vertical post containing the technical components.

PRODUCT SPECIFICATION

Light Source: 26W, 3000K

Dimensions: Height 48cm
Base Width 5.5cm
Total Width 20.5cm
