PRODUCT DESCRIPTION

Designer: Francisco Gomez Paz

Luceplan Mesh LED Ceiling Light

Designed by Francisco Gomez Paz in 2017, the Luceplan Mesh Ceiling Light is a more compact version of the Mesh LED Suspension, fitting snugly to your ceiling. The name was influenced by the materials used to create the lamp, the steel mesh that replaces a diffuser or shade. Instead of a diffuser, this steel mesh is combined with flexible cables which host numerous round LED reflectors. This modern day chandelier harbours a theatrical and dramatic appeal, making an impact in a range of interior styles.

The light source is highly personable and permits vast freedom in the ambience created. Utilising Luceplan's own app, the intensity of the light output can be adjusted. It is also possible to choose which parts of the light you wish to be illuminated using this app, the lamp consists of an upper ring, a lower zone and a lateral sector. Each of these can be illuminated individually or collectively.

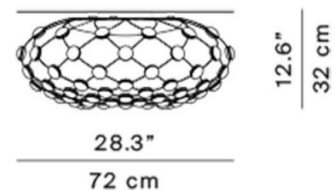

PRODUCT SPECIFICATION

Light Source: 50W, 2700K, 3518 Lumens

IP Code: 20

Dimming: Dimmable via mains phase dimming.

Dimensions: Depth: 32cm
Width: 72cm
