Room F50 Indoor Floor Lamp by Prandina

The Room floor lamp is one of Prandina's most iconic designs. Designed by hettler.tüllmann – a collaborative brand established by designer Katja Hettler and architect Julia Tüllmann – Room is a large, amorphous light-box whose irregular design started a trend for unusually shaped [floor lamps](#) when it was first released.

Designers hettler.tüllmann are known for producing designs which are at once minimal, traditional, and modern, and the Room floor light is no different. Inspired by standard textile lamp-shades, the Room lamp gives the impression that a regular, free-standing floor light is buried beneath the ground so that only its shade is visible from the surface. The [integrated LED](#) light source produces a warm, ambient glow which is perfect for emphasising a particular area of your space but also, as its name might suggest, for providing mood lighting to an entire room.

The Room indoor floor lamp is also strong enough to be used as a seat and a felt cover is available separately for added comfort. Combine multiple Rooms to ensure a consistent lighting scheme, or simply to create an interesting and unusual seating area.

This product is available with a dimmable option on request. Please [contact us](#) for more details.

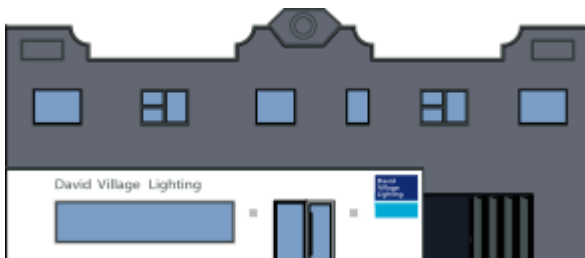

PRODUCT SPECIFICATION

Light Source: 1 x FBT E27 23W max (excluded)

IP Code: 20

Dimming: In line on/off switch included on cable

Dimensions: 63cm width
36cm height
51cm depth
2.8m cable length
