PRODUCT DESCRIPTION

Designer: Centrelight

Centrelight LED Multi Suspension

The Centrelight LED Multi Suspension Light is a unique lighting solution providing diffused illumination with an eye-catching silhouette. This luster feature luminaire is formed of blown glass spheres displayed at varying heights. Each sphere is connected to a steel rod, giving a creative style when gathered at the ceiling rose.

A double high-efficiency LED module is enclosed in the centre of the Centrelight Multi Suspension, generating warm, diffused indirect lighting. To further personalise the design, you can choose between either semi-transparent white or metallised mirror-finished spheres. You can also choose between two sizes, depending on the needs of your space.
