Astro Blanco Square Recessed Downlight

The Astro Blanco Square Recessed Downlight is a clean, architectural plaster downlight designed to be installed into ceilings that have already been plastered. Once fitted, the gap can be filled, smoothed and painted over, allowing the fitting to blend neatly into the ceiling for a seamless finish that suits a wide range of contemporary interiors.

Available in fixed and adjustable versions, Blanco Square offers flexibility depending on the setting and lighting requirements. The adjustable version can be tilted by 30° and rotated by 360°, making it particularly useful for directional lighting in bathrooms, hallways, kitchens and other interior spaces where a more controlled beam is needed. Its pared-back square form keeps the overall look discreet whilst still feeling considered and architectural.

Blanco Square uses a GU10 light source, sold separately, and is dimmable when paired with a compatible dimmable lamp. Rated IP20, it is suitable for indoor use, making it a practical option for spaces that need a subtle recessed lighting solution with a plaster-in finish.

PRODUCT SPECIFICATION

Light Source: 1 x Max 6W GU10 Dimmable (Excluded)

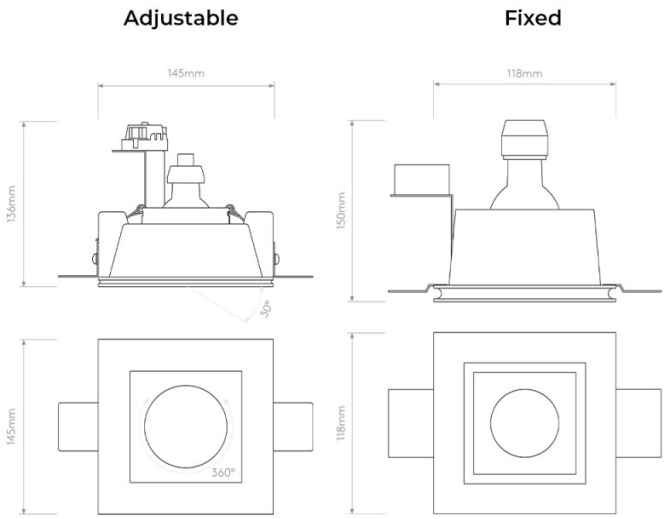

IP Code: 20
