Astro Blanco Round Recessed Spotlight

The Astro Blanco Round Recessed Spotlight is a minimalist plaster downlight designed to be installed into ceilings that have already been plastered, creating a clean, architectural finish. Once fitted, the gap can be filled, smoothed and painted to match the ceiling, allowing the spotlight to sit discreetly within the space and keep the focus on the light itself.

Available in fixed and adjustable versions, Blanco Round offers flexibility for different lighting needs. The adjustable version can be tilted by 30° and rotated by 360°, making it useful for more directional illumination in bathrooms, hallways, kitchens and other interior settings. Its simple circular form and plaster finish make it especially well suited to contemporary interiors where a seamless recessed look is preferred.

Blanco Round uses a GU10 light source, sold separately, and is dimmable when paired with a compatible dimmable lamp. Rated IP20, it is suitable for indoor use, offering a refined solution for spaces that require both subtle design and practical functionality.
