Astro Leo Switched LED Wall Light

The Astro Leo Switched LED Wall Light is a recessed reading light for bedside use and other close tasks. It has a compact backplate with an adjustable head, so the light can be aimed where it is needed without the fitting taking up much space on the wall. It works well in bedrooms, guest rooms, and hotel interiors.

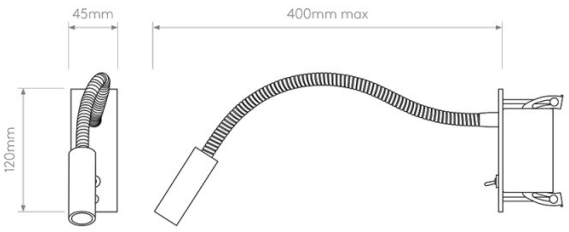

Finished in Matt Nickel or Bronze, Leo offers a choice between a cooler contemporary finish and a warmer metallic tone. The integrated LED has a 3000K colour temperature, CRI 90, and a narrow 21° beam, keeping the output controlled for reading or close task use. The switch is positioned on the backplate for straightforward operation beside the bed.

Designed for interior use, Leo can also be installed in bathroom zone 3. It is wired in, non-dimmable, and does not require a separate driver, with a brass body and recessed installation detail that keeps the fitting compact against the wall.

Best suited to bedside lighting, reading areas, hotel rooms, guest rooms, headboards, and bathroom zone 3 task lighting.
