Astro Park Lane Reader LED Wall Light

Astro Park Lane Reader LED Wall Light is a decorative combination reading light for interior walls. The main light provides softer ambient light when paired with a separate compatible shade, while the smaller LED spotlight gives a focused reading light below.

Each light source has its own switch, so the ambient light and reading light can be used separately. The fitting is supplied in Bronze, with compatible Rectangle 285 and Tapered Oval shades sold separately in selected fabric finishes.

Park Lane Reader LED uses one E27/ES lamp for the main light, sold separately, alongside an integrated 2700K LED reading light. It is wired in, Class I earthed, non-dimmable, and suitable for mounting on flammable surfaces.

Best suited to bedrooms, bedside walls, hotel rooms, reading areas, guest rooms, and softer interior task lighting.
