Astro Elis Twin LED Exterior Wall Light

The Astro Elis Twin LED Exterior Wall Light is a compact exterior wall light with light cast both upwards and downwards. Its square form keeps it neat on the wall, while the integrated LED makes it a practical option for entrances, patios, exterior walls, and bathroom zones 2 and 3. Elis Twin is available in Textured Black or Solid Brass, giving the choice between a clean architectural finish and a warmer brass version.

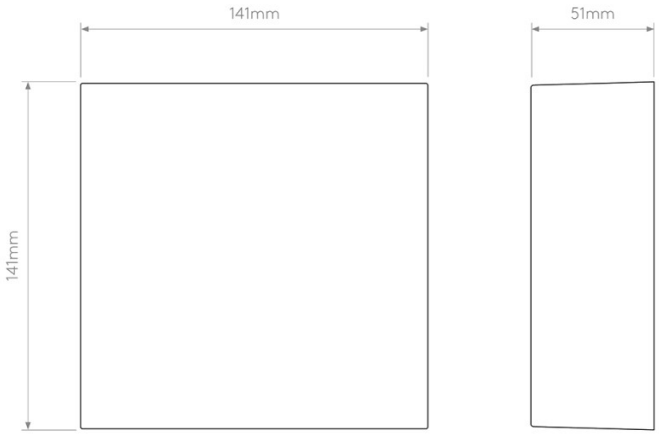

Rated IP54, Elis Twin can be used outdoors and in bathroom zones 2 and 3. The twin beam gives light above and below the fitting, which works well for doorways, exterior walls, and areas where you want a clear but fairly discreet wall light.

Elis Twin includes an integrated LED light source with a warm 3000K colour temperature and is supplied ready for wired wall installation. It is non-dimmable, suitable for mounting on flammable surfaces, and finished with clear glass detailing. Please note that this fitting is not suitable for installation within five miles of the coast.

Best suited to exterior walls, entrances, patios, garden walls, and bathroom zone 2 or 3 wall lighting.
