PRODUCT DESCRIPTION

Designer: Astro Design Team

Astro Beam One Exterior LED Wall / Floor Light

The Astro Beam One LED is a discreet and durable outdoor light designed for versatile installation across walls, floors, or ground surfaces. Compact in size yet robust in build, this recessed light withstands heavy loads of up to 800kg, making it ideal for driveways, pool areas, pathways, or garden terraces. Its IP67 rating ensures complete protection against dust and water, while its clean circular design integrates seamlessly into contemporary exteriors.

Engineered for longevity, the Beam One has been rigorously tested for 1,000 hours in salt spray environments, making it reliable even in harsher outdoor conditions. The warm 3000K LED provides a gentle 15-lumen glow, creating atmospheric accent lighting without glare, suitable for both residential and commercial projects. With its ability to perform in bathroom zones 1, 2 and 3, this recessed fitting also adapts well to indoor architectural use.

Supplied with a non-dimmable driver as standard, the Beam One can also be paired with dimmable drivers for additional lighting control. Its low-profile design and durable aluminium construction ensure both functionality and subtle elegance. This is a versatile architectural light that merges minimalist form with exceptional resilience.

Please note, this product comes with a non-dimmable driver as standard; dimmable drivers for a range of dimming systems are available. Contact us for pricing and information.

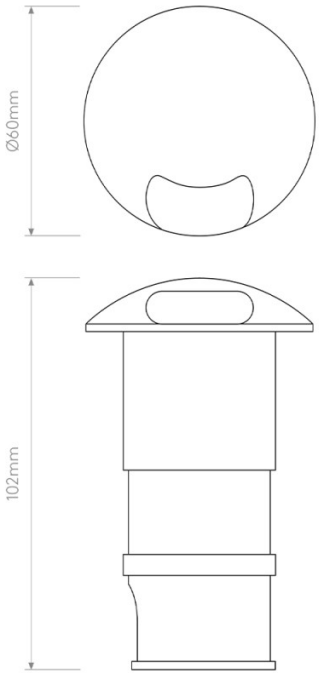

PRODUCT SPECIFICATION
