Axolight AX20 PI Ceiling/Wall Light

PRODUCT DESCRIPTION

Designer: Manuel Vivian

AX20 PI Ceiling and Wall Light by Axolight

The AX20 Collection was created by Manuel Vivian, and is a trued testament to his success and unique approach to his designs. The AX20 PI wall and ceiling light is the short version inside the collection, which includes the AX20 GR with a longer arm. A fully adjustable and rotatable light, the perfect lighting solution for reading in bed or the living room. The AX20 lights are an ideal choice for both residential and commercial projects, but also in hospitality. The light is adjustable in both axes, as the shade can tilt up to 100° or rotate up to 180°; thus emitting a fully directional light and the perfect reading companion. The AX20 PI can be installed either on the wall or the ceiling, and its adjustable properties allow you to direct and highlight certain elements within the room.

The AX20 Collection also includes a floor lamp, a suspension and another wall light.
