PRODUCT DESCRIPTION

Designer: Paolo Lucidi & Luca Pevere

Foscarini Bahia LED Ceiling / Wall Light

The Bahia LED wall light is a delightful light designed by Luca Pevere and Paolo Lucidi, a design duo known for taking materials and using them in new, innovative ways to produce stylish and modern designs. The wall light is made from three asymmetric layers in circular shapes that play with light and shadow. The first two layers encase the integrated LED light source, pushing the light to the edges. The third layer sits atop the light source to spread the light even further and to create an interesting interplay between darkness and light.

The Bahia LED wall lamp is available in both a non-dimmable and dimmable version, with a white finish so it can match many colour schemes. The wall lamp can be used singularly or in multiple ways to create intriguing configurations on the wall that will amaze and catch the eye. Use in corridors, lounges, dining rooms and many more in both homes and commercial spaces. This light is also suitable for use on the ceiling, giving you endless choices and possibilities. For a smaller size, check out the Bahia Mini LED wall light.
