PRODUCT DESCRIPTION

Designer: Naoto Fukasawa

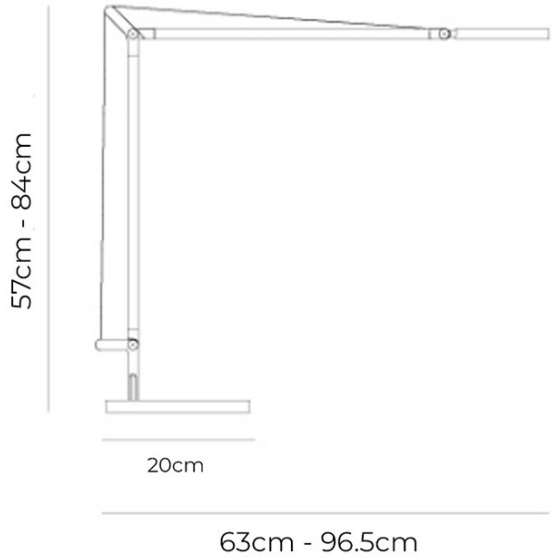

Artemide Demetra LED Table Lamp with Movement Detector

One of Artemide's classics, if not reminiscent of the Tolomeo lights, the Demetra Table Lamp was designed by Japanese industrial designer Naoto Fukasawa. Fukasawa bases his design on the 'Outline' concept, which focuses on the harmony between an object and its user. The Artemide Demetra Table Lamp, although one of the standard lights in the collection, is now available with an integrated motion sensor. The luminaire automatically detects movement, and after 12 minutes of inactivity, it will automatically switch off. This feature is in addition to the standard integrated microswitch dimmer that is located on top of the head/diffuser; the switch lets you control light intensity to suit your needs.

As well as a sleek design, Demetra offers a wide range of movement and flexibility; with an adjustable head and arm, you can provide direct light depending on the use and task at hand. For this reason, this functional table lamp makes an exceptional task lighting solution. The family includes a wide range of lights, floor and desk lamps, wall lights and spotlights. The interactive feature of a motion sensor is available for the table lamp and the wall light; meanwhile, the wall and table lights are also available in a Micro size, for an even more compact light.

PRODUCT SPECIFICATION

Light Source:	8W, 3000K, 385 Lumens
IP Code:	20
Dimming:	Integrated microswitch dimmer on the product.
Dimensions:	Height: 57cm-84cm Depth: 63cm-96.5cm Base: 20cm
