PRODUCT DESCRIPTION

Designer: Guillaume Delvigne

Fabbian Aerostat Pendant

Designed by Guillaume Delvigne, the Fabbian Aerostat Pendant is an elegant lighting solution available in two sizes. For Delvigne, the inspiration came from the principle of the Aerostat, to make an object that is lighter than air. This pendant light features a white blown glass diffuser that is held within a cage-like metal suspension structure. This structure is available in three finishes, Black, Brass or Copper which ensures it can easily adapt to a range of modern interiors and please numerous personal styles. The matching ceiling canopy ensures a cohesive aesthetic throughout the whole design.

The Fabbian Aerostat Pendant produces a functional but glare-free illumination that can be easily dimmed to suit your needs. It can be displayed individually or in groups, either in linear arrangements above dining tables and kitchen islands or in gathered clusters of varying sizes in areas such as entryways or stairwells. A great addition to living rooms, kitchens, dining rooms, entrance halls and even bedrooms.
