Marset Concentric wall light

Concentric is an exceptionally striking design whether it's illuminated or not, when the sun sets it becomes the most impressive and dynamic play of colour and geometry. The effect is almost hypnotic, concentric circles are outlined by the most vivid and rich colours.

Concentric's design emerges from Rob Zinn, a talented product & furniture designer who's observation of a natural phenomenon inspired his creation. While on an airplane, Zinn noticed the effect of the sunlight entering through the windows and reflecting the vibrant colours of the passengers' clothing on the curved white surface of the airplane's interior.

Marset Concentric is based on an artistic experiment to highlight the interaction between light and the reflection of colour, each circular panel connects with a different colour to create a multi layered effect. In daylight, these colours are subtle and beautiful, at night when the lamp really comes alive to reveal its lighting effects. Concentric's shape is also reminiscent of the sun.

Creating a soft and indirect light, Concentric is perfect for social areas such as living rooms to acts as a statement piece, or even hallways can benefit from the surprising colours and form of this wall light. Available in three sizes and and two striking colour ways, Marset concentric is a versatile design for contemporary spaces.

Designer: Rob Zinn

Dimming: Phase cut dimmer leading and trailing edge.

Dimensions:

Small:

61 cm diameter
16.9 cm depth

Medium:

81.5 cm diameter
16.9 cm depth

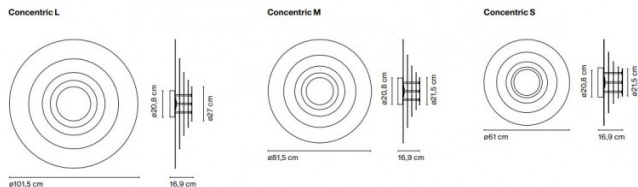

Large:

101.5 cm diameter
16.9 cm depth

Colour: Corona

Minor
