Innermost Bolt Wall Light

The Innermost Bolt LED Wall Light brings an industrial edge to modern interiors. With a design centred on honesty in construction, the Bolt light features decorative bolts along its face, creating a subtle yet distinctive detail. Its aluminium body not only enhances its industrial aesthetic but also acts as an efficient heat sink, ensuring longevity and stable performance. This wall light offers a high output that effectively illuminates spaces while maintaining a low profile, making it a suitable addition to modern homes, commercial environments, and architectural projects.

The Bolt is designed with versatility in mind, offering options for recessed installation that reduces its profile to a mere 6mm, blending seamlessly with walls. Available in a white finish or in a range of custom colours upon request, this dimmable wall light provides both ambient and task lighting options. Perfect as an accent piece or for functional illumination in hallways, workspaces, and more, the Bolt LED Wall Light offers a refined balance of form and function.
