PRODUCT DESCRIPTION

Designer: Arik Levy

Vibia North 5600 LED Floor Lamp

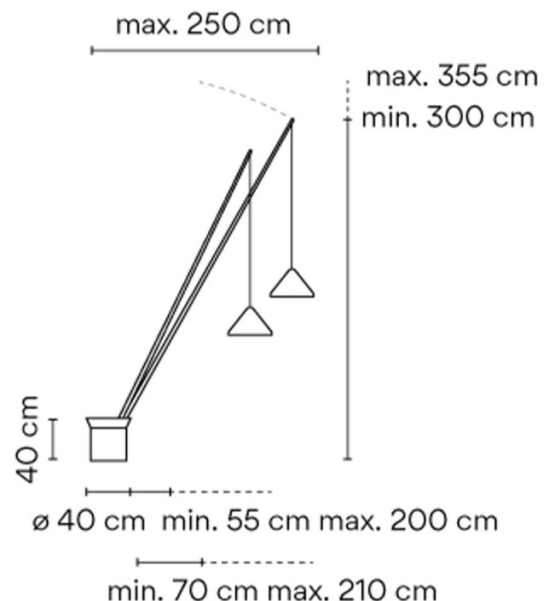

The North 5600 Floor Lamp is a unique lighting solution consisting of two carbon fibre poles that protrude from a solid steel base. Designed by Arik Levy, this floor lamp utilises geometric shapes, the adjustable poles make it possible to bring light to exactly where you want or need it and provide a focused lighting effect. Despite the size of the North 5600 Floor Lamp, the design remains unobtrusive and minimalistic thanks to the deconstructed silhouette.

Available in a range of neutral and calming finishes, the Vibia North can easily blend into almost any contemporary interior - both residential and commercial. Display it in large open-plan living spaces, dining areas or offices; similarly, it creates a beautiful effect in spaces in the hospitality industry such as restaurants, bars and hotel lobbies.

More floor options are available, please [contact us](#) for more information and pricing.
