## PRODUCT DESCRIPTION

**Designer:** Arik Levy

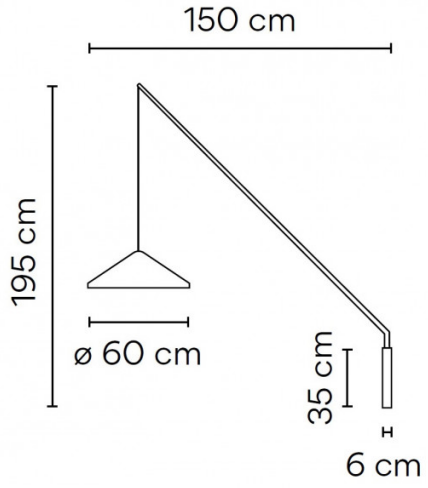

### Vibia North 5630 LED Wall Light

An elegant and dynamic design by Arik Levy, the Vibia North 5630 LED Wall Light utilises a carbon fibre rod which is suspended from the wall and holds a conical shade. The wall mount and the light source are separated from one another in space to offer a surprising lighting effect. Powered by LED technology, the North Wall Light creates a functional downward illumination that can be manoeuvred from side to side to ensure it grants you light where you need it most.

Offering you the choice between four finishes (Black, White, Beige or Blue), this unique wall light suits a range of contemporary interiors and can be displayed individually or with numerous lamps on larger walls. A beautiful addition to living spaces, dining rooms, kitchens, restaurants, bars or offices. Although a bold design, thanks to the deconstructed silhouette, the North Wall Light is an unobtrusive lighting solution.
