FLOS

Kelvin LED Edge Table Lamp by Flos

A functional and contemporary masterpiece, the Flos Kelvin Edge table light is perfect for both domestic and professional use. Displaying high levels of craftsmanship in its mechanisms and design, the Kelvin Edge has a directional head which allows the angle of light to be adjusted 180 degrees making it perfect as a reading companion or task light.

Along with adjustability of both the arms and head of the Kelvin LED Edge table lamp, the head of the light also features soft touch dimmer technology. The dimmer changes the colour temperature in three stages going from 2700K (warmest white) to 3200K (warm white), so you can create the ambience you need in your interior.

The Kelvin Edge is also available as a [wall light](#).

Designer: Antonio Citterio
