FLOS

Kelvin LED Edge Wall Light by Flos

Designed in 2015 by Antonio Citterio, the Kelvin Edge wall light has gained a reputation for being an archetype of its genre. Produced by Flos, the Kelvin Edge wall lamp is slim and clean lined and provides direct light.

The ultimately adjustable design, the wall light has movable arms, joints and a square head that can be rotated 180 degrees, allowing the user to direct light output where required, making the Kelvin a perfect lamp for accompanying tasking or reading. The Kelvin Edge LED wall lamp also includes soft touch technology and a touch dimmer on the head of the lamp allowing the light emission to be dimmed in 3 stages. The dimmer allows you to move from a colour temperature of 2700K (warmest white) to 3200K (warm white), so you can create the right atmosphere for your needs and interior.

The wall lamp comes complete with a cable and plug, and the [Kelvin range](#) also includes a table lamp, floor lamp and lamps with Green Mode for even greater energy saving capabilities.

Designer: Antonio Citterio

IP Code: 20

Dimming: Integrated dimmer on the product

Dimensions:

41.4cm height

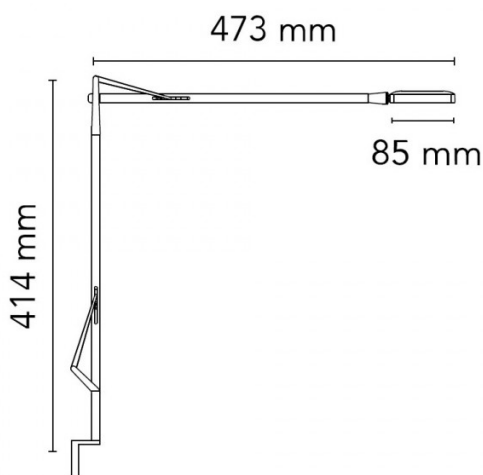

47.3cm depth

8.5cm lamp head

150cm cable length

Colour: White

Black
