PRODUCT DESCRIPTION

Designer: Neil Poulton

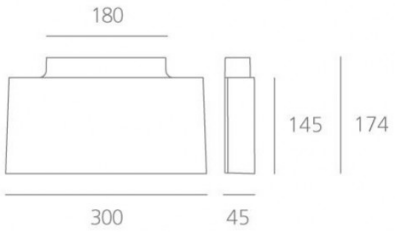

Artemide Surf 300 LED Wall Light

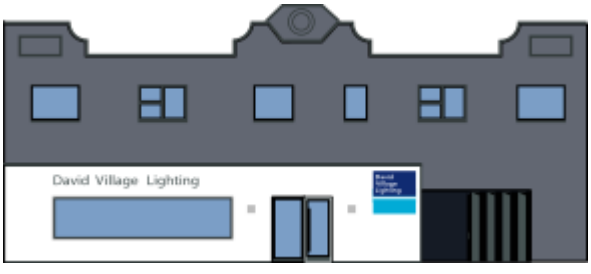

The Artemide Surf 300 LED Wall Light, designed by Neil Poulton, is a minimalist fixture defined by its gently curved aluminium body that appears to float against the wall. Finished in white painted metal, its slim, wave-like form conceals the light source within, giving it a clean, architectural presence that blends discreetly into interiors while still offering a refined, contemporary aesthetic.

The Surf 300 LED Wall Light features an integrated LED. When switched on, it produces soft, indirect illumination, projecting light upward and outward to create an even, glare-free wash across the wall. This ambient, reflective lighting makes the Surf particularly well suited to hallways, living rooms, and bedrooms, as well as public or commercial settings such as corridors, offices, and restaurants, where subtle, atmospheric lighting and unobtrusive design are desired.
