PRODUCT DESCRIPTION

Designer: Rodolfo Dordoni

Foscarini Buds LED Pendant Light

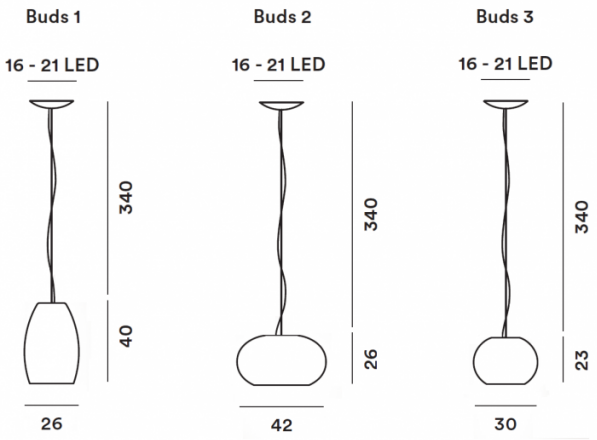

The Buds LED pendant is a beautiful, chic light that is made from gorgeous blown glass that is hand-crafted from 5 layers. This pendant was developed as part of the Foscarini Buds collection in the 1990s alongside other ranges called Blossom and Fruits, all inspired by natural elements. The Buds range has now been updated and redefined to present a contemporary and stylish light for the modern user.

The Buds LED pendant light is available in 3 versions, which all have a captivating look and different character. Each lampshade has smooth lines and emits a downward light. The glass also diffuses the light to emanate a soft glow, perfect for creating a welcoming atmosphere. The LED light source is integrated, being an energy-saving and long-lasting lighting solution. Use it as a main light in many different settings, or buy several in different types and colours to put in rows or clusters.

This version of the Buds LED pendant is non-dimmable. For a dimmable version please contact us.
